About Us

Welcome To Cedar Spaces

If you're thinking about getting a garden room, you've come to the right place. We have a 5 Star Google Rating and 85% of our projects are referrals.

Maybe you're in need of a fresh space or a space to relax and recover in your home. You might be looking to build something that adds a totally new dimension to your home or you might just need somewhere safe and secure for the kids to hang out with their friends.

Welcome to Cedar Spaces. Our team specialises exclusively in **garden rooms that transform how people live and work at home.**

Our first garden rooms were finished in cedar wood because we fell in love with this red-toned, spicy-scented wood that looks and feels luxurious. Over the years, we've naturally expanded the range of what we offer to suit different budgets and aesthetic needs but our values as a business haven't changed. We believe in leaving behind buildings that clients are proud to look at and enjoy using.

We build garden rooms that transform how people live and work at home

Our builds are **fully insulated, heated**, and designed for **year round use**. They are finished to the highest standards with ventilated roof spaces, plastered walls, flooring, LED lighting, and premium glazing. Externally, you can choose from a wide range of cladding options from natural timbers to modern composites, ensuring your garden room complements your home perfectly.

"A really well built structure that we've really enjoyed using all year round."

Brian and his team built our garden room with sauna 2 years ago, and it still looks brand new, inside and out. A really well built structure that we've really enjoyed using all year round. We would highly recommend Cedar Spaces. **J Watson**

"Cedar Spaces and the team were fantastic in very difficult weather conditions."

Cedar Spaces and the team were fantastic in very difficult weather conditions. The design and build process was detailed and informative and the end result was an excellent living & working space. I highly recommend Cedar Spaces for the work and product they offer. **M David**

"Can't recommend highly enough!"

Excellent service and brilliant quality office. Can't recommend highly enough!
R Emami

We were one of the first garden room businesses in the Harpenden area. I built my own in 2018 originally as a home office for me. During Covid, my wife worked from it and now as our kids have grown, it's morphed into an overflow space from our living room - one they can use independently.

At Cedar Spaces, we specialise exclusively in fully insulated, heated and year-round use garden rooms. That means that all we do, week in and week out, is design and build beautiful yet functional spaces for local families and businesses.

As a small business, your project is more than just a job to us. We employ a local team, buy from local trade merchants and use local suppliers across our project. My family and I live in the area and I'm available throughout your project and beyond.

Our business has grown because we understand how people live today. We've built spaces that have become gaming rooms, gyms, guest rooms, saunas and golf studios.

Our Work

For over six years, we've been building garden rooms in and around St Albans Harpenden, North Herts and the surrounding areas.

Most of our work comes from word of mouth; chances are we've built for someone you know.

From bathrooms to built-in saunas, every garden room is designed around how you'll use it.

Each build is personal and our spaces are designed to grow with our clients and their homes.

Because we're local, we go the extra mile on service. We're part of the same community and that shows in how we work.

When we say bespoke, we mean it!

"The whole process from beginning to end was easy and smooth - it was a pleasure working with Brian and his team."

We are delighted with our garden room from Cedar Spaces! The whole process from beginning to end was easy and smooth - it was a pleasure working with Brian and his team. Brian was great at talking through options to ensure the room was just what we wanted and in budget. The build was quick and completed to a really high standard. As a family, we are already loving the extra space - I'm using it for work but it's also a great room for chilling and spending time with friends. It's so well insulated and the heater is really efficient that it feels very cosy on cold days. It will be well used throughout the year. Finally, it looks fab! **K Haynes**

What To Expect

As a prospective client, here are some details we want you to know.

- **We design your garden room with you – no lifted or repeated designs**
- **We work across a wide range of budgets**
- **We don't believe in "one size fits all" pricing**
- **Your budget is respected at every stage of the build**
- **A skilled team manages your project from day one**
- **Every project is overseen and signed off by Brian, the founder of Cedar Spaces**
- **Every garden room is backed by a 10-year structural warranty**

Every garden room is backed by a 10 year structural warranty, so your investment is protected.

Cost And Investment

Every project is unique, so we don't believe in "one size fits all" pricing.

We know deciding where to invest in your home is a big decision - emotionally as well as financially. Unlike most things you put in your garden, our rooms are built to last. They're not temporary structures; they're extensions of your home, designed for long term use. We'll work closely with you to understand your priorities and tailor a design and price that make sense for your lifestyle and budget.

Each space is tailored to your garden, lifestyle and wellbeing goals, creating a private retreat designed for relaxation, recovery and year-round use.

NEW for 2026

Our Process

Site Survey & Design Discussion

We visit your garden to understand the space and offer advice. Every design is bespoke, so this step is about turning your ideas into a practical plan.

Quotation & Agreement

We provide a detailed quotation and answer any questions. Once you're happy, a 30% deposit secures your project and allows us to order materials.

Build & Delivery

We coordinate everything and begin your build. Most garden rooms are completed within 15 working days, with smaller spaces often finished in a week.

Enjoy Your New Space

Once finished, your Cedar Space is ready to use and enjoy. And with our aftercare support, we'll ensure everything is perfect for years to come.
